

Rebuilds & Used Equipment

Rebuilding

Reed-Rico rebuilding programs can be structured in a variety of ways to fit your situation. From sub-assemblies such as gearboxes, heads and die holders to complete machines carrying new machine warranties, we can find a way to increase your productivity at a fraction of the new equipment cost. These programs are available for all Reed-Rico®, Prutton™ and Hartford® machines.

Used Equipment

Contact the Reed-Rico Machine Sales Department for information on buying, selling or trading-in used threading equipment.

Left: This machine has been disassembled for a "complete" rebuild. All shafts, gears, bearings, seals and wiring are replaced. Only the castings are reused.

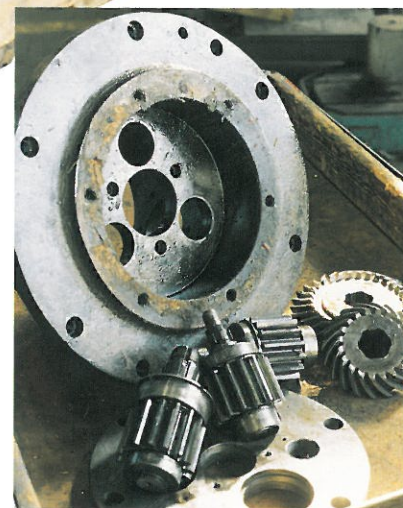

Right: The result is a virtually new machine with a one year warranty.

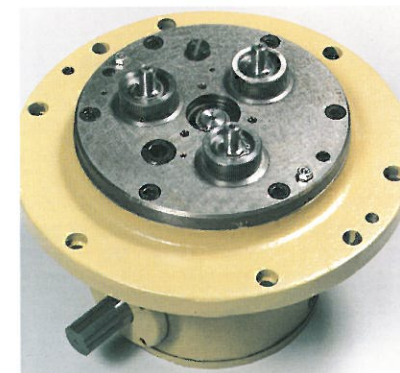

Below Left: Overhung die holder

Below Right: Double support die holder

Die holder assemblies can be rebuilt to factory specifications.

Left: Gearbox disassembled for rebuilding. Below: Refurbished to "like new" condition and ready for reinstallation.

The O.E.M. Advantage

With our application experience and die manufacturing capability we can offer used equipment, set-up and running parts to your specifications. The machine will be ready to run when it hits your floor. This is a big advantage if you are unsure of the process or tooling required. We offer many options to meet your needs and your budget.
